

Please do NOT lessen the telephone privacy law in Indiana by creating or implementing a lower standard federal law. Because I have signed up for the no call list in my home state of Indiana, I no longer receive unwanted phone calls, nor do I have to listen to solicitors who do not want to do a phone calling sell, who sometimes are irate and pushy, and who disrupt family quiet time. If you enact a federal ruling, please consider our state's commitment to its citizens and use it as an example for all US citizens.
